

Sep 13-16, 2021 49th Annual Advances in Family Medicine and Primary Care

This is the 49th year that the Department of Family Medicine at the University of Washington School of Medicine is offering educational opportunities for family medicine and primary care health care providers. Each year our goal is to provide current information about practice skills and the diagnosis and management of a broad array of primary health care issues.

This year we are excited to announce the opportunity for learners to participate in the live activity and/or watch the recordings of the live talks through March 1, 2022 and obtain CME credit. Please note, credit cannot be claimed for both participating during the live webinar and watching the recording at later date.

Nov 4, 2021 14th Annual John D. Loeser Pain Conference: Chronic Pain Management for Primary Care in a Changing World

The 14th Annual John D. Loeser Pain Conference will focus on the practical approaches to management of common painful musculoskeletal conditions, the impact of chronic illness and a pandemic on chronic pain management and how to support patients chronic pain care regimens utilizing virtual technologies, updates on opioid prescribing rules, guidelines and best practices including new rules for prescribing opioids for older adults, and how to manage buprenorphine for chronic pain and understanding the role cannabinoids may play in pain treatment.

Enduring Materials

Diabetes Management in Primary Care Through Telemedicine (FREE)

In this enduring material, tips for outpatient practices are offered to manage individuals with type 2 diabetes using telemedicine and available continuous glucose monitoring technology.

13th Annual John D. Loeser Pain Conference: Chronic Pain from Disease, Injury and Other Life Traumas: Identification, Prevention, and Management

This recorded webinar features faculty who will emphasize vulnerable populations, review clinician-led approaches to patient pain education, propose why opioids may interfere with improvement, and how multidisciplinary care delivered via telehealth offers opportunities to increase access to effective chronic pain management.

Comprehensive Hematology and Oncology Board Review Course

This online program will cover data supporting guidelines, recommendations and recent advances regarding therapeutic options for patients with solid tumors and hematologic disorders. More information can be found here: <https://www.seattlecca.org/story/12th-annual-virtual-comprehensive-hematology-and-oncology-review-course>. (Online September 2021)
